for quality assurance

Coastal comfort redefined

The Breezeless E offers smart features for immersive cooling enabled by innovative AI energy efficiencies, clean air technologies, and fast, breezeless operation.

FRESH COASTAL AIR, NOW EVEN HEALTHIER

The Breezeless E cares for your family's health with the innovative Air Magic+ and i-Clean technology which eradicates airborne bacteria and viruses. The UV PRO adds a further layer of protection by directly destroying bacteria.

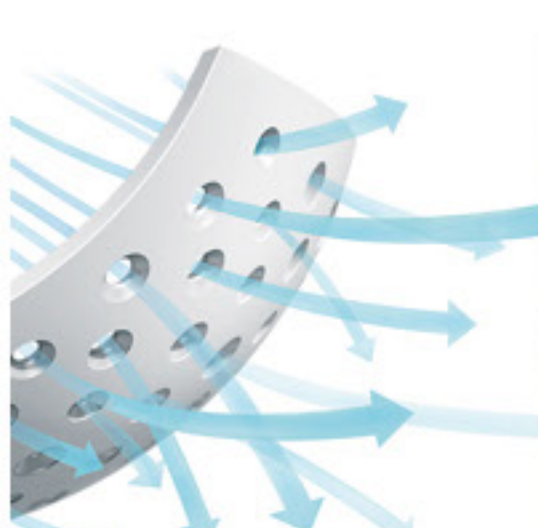

AI ENERGY MANAGEMENT

The Breezeless E intelligently studies your changing environment and user preferences to calculate and modify the optimized operation mode. Keeping you comfortable and minimizing energy consumption.

CALM SURROUNDINGS WITH BREEZELESS AIRFLOW

With Breeze Away, Breeze Mild and Breezeless modes you can enjoy comfort that feels the way nature intended.

The Twinflap™ structure with thousands of holes transforms strong airflow into strings of air for soft touch cooling.

Midea Cool Flash Plus technology can reduce the temperature of large volume rooms by 6,3°C in as little as 10 minutes.

With strong airflow, Heat Flash technology can quickly warm your room, raising the temperature by 10,4°C in 10 minutes.

Get in touch with your local Midea air conditioning installer for more information and the best advice.
